1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1,8,11,12,17,22,23,24,25,26,27,28 are rejected under 35 U.S.C. 102(b) as being anticipated by Lewis et al 6,082,616. Lewis discloses an automated banking machine with a housing having sidewalls, a top wall, a rear wall and an interior space (col 3 lines 7-18). There is disclosed a rollout tray 32 (col 3 line 39), i.e. a "frame". On the tray is a display (also interpreted as a light indicator operatively emitting signals), a receipt printer and a fascia (col 3 lines 44-55). There is disclosed an opening for accepting cards in the fascia, a keypad in the fascia (col 3 line 56 – col 4 line 11). It is disclosed that cash may be dispensed (column 2 line 32-40). Although not specifically disclosed in Lewis, at least one computer operably connected to the display, receipt printer, fascia and keypad is inherent.

4. Claims 2-7,9-10,13-16,18-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to teach or fairly suggest to one of ordinary skill in conjunction with all the other limitations of the subject claims and any claim they depend upon, the pivoting connection of claims 2-3,7; the bezel of claims 4-6,13-14; the LED of claims 9-10,18-21; or the portion movable in at least two dimensions as in claims 15-16.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lewis et al 2001/0000644, Kallin et al 2004/0118657, Laskowski 2003/0116478, Ghafoor et al 2002/0128970, Holmes et al 2002/0073032, Graef et al 2002/0033359, Lewis et al 6,527,172 and Junkins et al 6,648,220 all disclose ATM machines with front fascias held in a housing or frame.
